

SWITCH

Ref: 41.004
Ref: 41.005

12V - 24V
12V - 24V

A small switch with a touch dimmer function for inserting inside our led profiles.

The cover is placed on top of the switch (this does not require any type of manipulation of the profile).

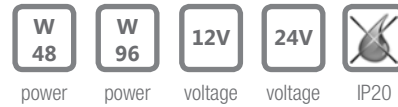

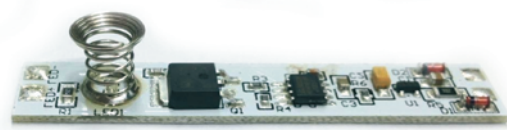

It can be switched on and off and the led intensity can be regulated from 0% to 100%.

We recommend a layer of insulating tape on the lower part of the sensor when mounting in the profile to avoid malfunctioning.

This product is only recommended for indoor use and only 1 sensor can be used in the same luminaire.
