

Our led profile PROFESSIONAL series for surface is manufactured in 6 different colours of polycarbonate. The profile is suitable for perimetral illumination and can be used in facades, buildings or similar.

It is compatible with led strips with a maximum thickness of 15mm and a power not greater than 20W/m.

We recommend using our ecoled strips Canovelles-Vizcaya-Cob IP67- Castellón RGB in order to achieve a more uniform and homogeneous illumination.

**Designed by Luz Negra - Made in Spain**
