

# led profile by Luz Negra

Our BASIC led profile series for surface applications is manufactured in a grey coloured flexible silicone (on demand, we can supply different finishings).

This profile is specially suitable for embedding into straight or curved wooden surfaces (minimum bending radius being 20cm).

Suitable for led strips with a maximum width of 10mm and a power not greater than 10W/m.

This profile does not have any cover, so we recommend using it with our Ibiza PRO ecoled strip, which offers an IP67 DUO protection layer (preventing dust and dirt from entering).

**We offer a 2 year guarantee.**
