

Our PROFESSIONAL led profile series for recessing applications is manufactured in high purity aluminium and lacquered in white or textured black. Drivers can be housed inside. The internal tray allows us to screw the rigid led strip on one side and enables us to house the power supply on the other. At the same time this tray can be removed from the front which means easy maintenance. For safety we recommend fixing a braided cable from the profile base to the tray. Both profile and cover are available in 3.4m lengths.

**We offer a 5 year guarantee on the profiles and covers.**
