

Aluminium profile in silver anodised, white lacquered textured or black lacquered textured.

It can be used with other profiles or furniture for tensing the textile.

The textile can be fixed into place with sewn silicone or, on request (with no additional charge) we can supply a small DUOflex bar which means the textile can be tensed simply with a spatula without having to sew the textile or the silicone.

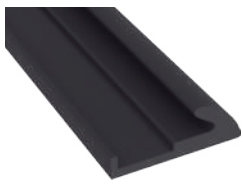

F10

(L) 34 x (H) 7,60 mm

Aluminium profile

66.004	silver adodised	6.1m
66.002	white lacquered textured	6.1m
66.003	black lacquered textured	6.1m

DUOflex bar

74.001	black plastic	2m
--------	---------------	----

Spatula

74.025	tensioning spatula
--------	--------------------

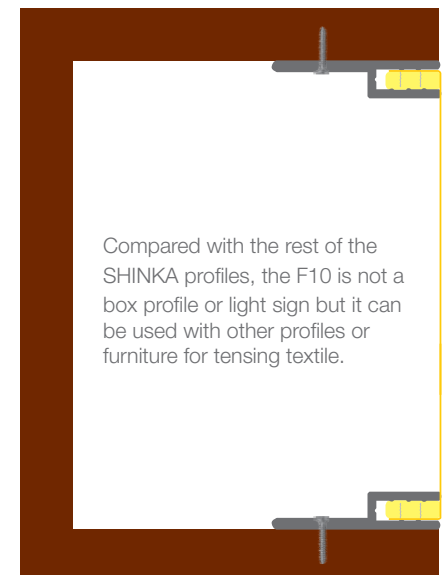

Textile with sewn silicone.
Can be applied or replaced easily.

Jonquil DUOflex + spatula

Textile can be tensed simply with a spatula without having to sew the textile or the silicone.

Compared with the rest of the SHINKA profiles, the F10 is not a box profile or light sign but it can be used with other profiles or furniture for tensing textile.
