

MOVEMENT SENSOR

SENSORS AND SWITCHES

Ref: 41.006

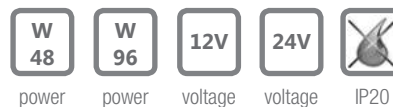

12V - 24V

A small movement sensor for inserting inside our led profiles which is activated on detecting movement from a distance of approximately 2.5 metre and at a 90° angle.

As long as there is movement the sensor will stay activated, but once it fails to detect any presence, it will remain "ON" for 45" and will then switch off.

We recommend a layer of insulating tape on the lower part of the sensor when mounting in the profile to avoid malfunctioning.

The cover has to be perforated so that the sensor's head remains visible.

Power (W)	48W (12V)
Power (W)	96W (24V)
Channels (output)	1
Amps	4A
Measurements	48x12x10mm
Detection angle	90°
Movement detection	2.5 metre
Weight	4.8g
Waterproofing	IP20
Packaging	1 unit
Guarantee	2 years

Sensor mounting (orientation)
