

# led profile by Luz Negra

Our BASIC led profile series for ceilings and walls is manufactured in high purity aluminium and available in white. This profile is designed to be used in ceilings or walls, offering an easy and elegant perimetral lighting. This is perfect for concealing the edges in false ceilings. Suitable for led strips with a maximum width of 12mm and a power not greater than 20W/m. We recommend our COB or Elite ecoled strips in order to achieve a homogeneous lighting, while also improving the dot free effect.

**We offer a 2 year guarantee on our profiles and covers.**
