

led profile by Luz Negra

NEON SLIM

A very small, high quality silicone profile with a transparent front, etched with fine lines which favours a low UGR.

It is suitable for perimetral decorative lighting for cavities etc and as it is extremely thin, it is also ideal for publicity texts and corporate letters on a small scale (its flexibility allows us to create very small letters). It has an internal cavity that can house an IP20 led strip, with a PCB of 8mm and the recommended power not greater than 12W/m. We recommend combining this profile with ecoled COB 8mm (dot-free effect).

Thanks to its IP67 waterproofing and its UV protection, this product is suitable for outdoor areas and damp zones (sealing the connector and the endcap with the recommended silicone is a must).

We offer you this profile in 100m rolls or cut to size (minimum 1m MOQ).

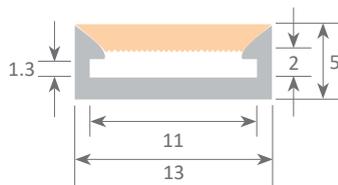

We offer a 2 year guarantee.

Scale 1:1

Scale 1:2

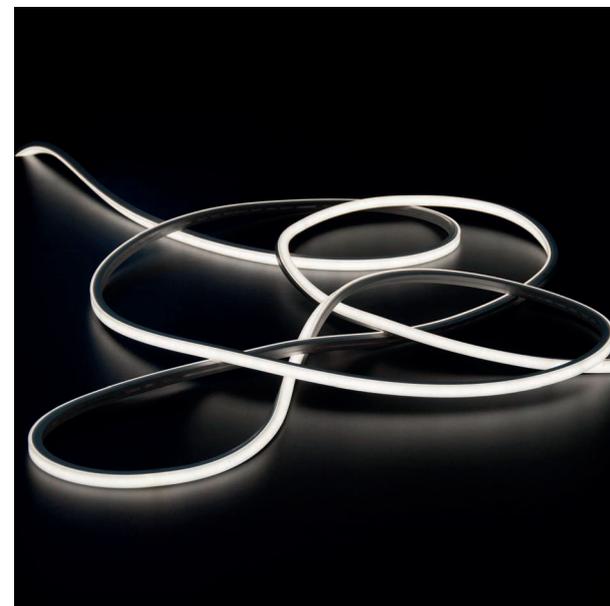

Neon Slim Led

10.217 Neon slim 50m
(Max. PCB 10mm)

Silicone endcaps

19.184 with front hole
19.185 without hole
19.181 without hole
19.182 with 2 holes
19.183 with 4 holes

Silicone for waterproofing

22.138 opal 45ml
22.140 transparent 45ml

Clip

20.077 silicone
20.075 plastic
