RGB WIFI RECEIVER

SEQUENCERS FOR LEDS

Ref: 41.067   5V - 12V - 24V

Allows multiple modes and effects.

It is governed by a smartphone or tablet with IOS operating system version 6.1 (Apple) or Android version 4.0 downloading the free app "Dream Colour" or similar.

PLAYLED III driver (for Android 2.1 and IOS 4.1 version).

An installation manual and a static IP are provided to be able to connect via wifi.

FUNCTIONS:

STATIC COLOUR (3 options) with 36 preset modes:

• ByHand (to choose the desired colour).

• Gravity (moving the phone or tablet will be selected a colour from the "Gravity" palette resulting in the colour in the LED.

• Random (equal to Gravity but to give greater or less speed to the colour changes that occur when we move the phone or tablet).

DYNAMIC COLOR:

• With this function we choose the desired colour by touching the screen with your finger making a slight flicker.

MODE SELECT, 50 custom modes:

• For ON/OFF and to select different effects options and colour transitions.

• At the bottom there are 2 speed and brightness control bars (from least to most).

CUSTOMIZE MODE:

• Within this menu we can generate to our liking all the selection sections "Mode Select".

MUSIC MODE:

• This option if you select music on your tablet or smartphone, there will be colour changes to the rhythm of the music that is playing.

DIY MODE, 50 gradual colour changes:

• To perform a programming and configuration of colours and parameters. Up to 9 colours we can generate existing ones.

COLOR EDIT:

• To modify the parameters (amount of colour tone) of "red" and "blue" being able to leave an intensity of them for any type of programming that we have to do.

PASSWORD:

• Allows you to assign a security password and control password so that it cannot be manipulated.
