

MINI AMPLIFIER

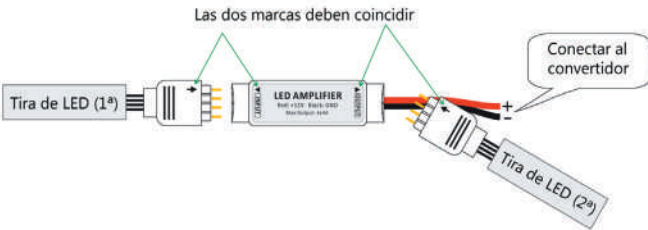

AMPLIFIER

Ref: 41.009

5V - 12V

MINI amplifier for RGB leds, which due to its reduced size can be fitted in places where visual impact is minimal.

We always recommend the use of an amplifier when the led installation is more than 5 linear metre or more than the admitted power in the sequencer. It can be fitted into our Versalles profile.

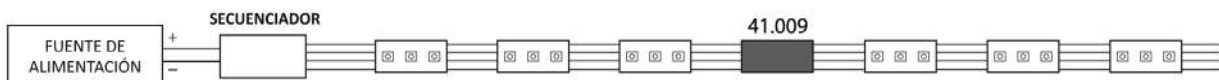

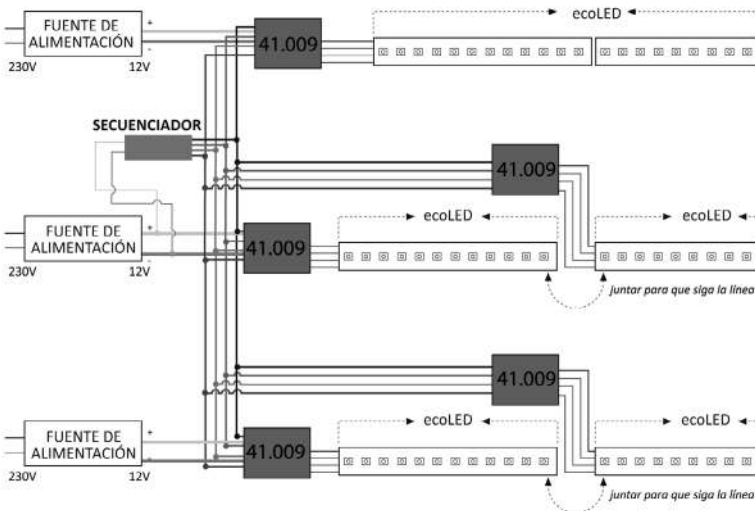

W 60	W 144	5V	12V	
power	power	voltage	voltage	IP20

Power (W)	60W (5V)
Power (W)	144W (12V)
Channels (output)	3
Amps	4A x channel
Measurements	42x12x3mm
Waterproofing	IP20
