

**MOVEMENT SENSOR**

**SENSORS AND SWITCHES**

Ref: 41.007

12V - 24V

A small movement sensor for inserting inside our led profiles which is activated thanks to an infrared sensor and can detect movement from a distance of approximately 2m, lighting up the led strip.

The 12V and 24V strips inside the aluminium profile can be switched ON / OFF.

Once this sensor stops detecting movement, the led strip will turn off after 40 seconds.

It is necessary to make a hole in opaque cover in the profile for the sensor to fit in.
