

RGBW surface control panel

Ref: 41.030

Features:

- It is capable of controlling 4 different zones.
- 2.4GHz high RF wireless control with long distance controlling.
- It supports ON/OFF, colour, colour temperature, saturation and brightness control.
- Touch control, touch sensitive.
- Compatible with receivers: 41.026 / 41.071 / 40.017

Technical characteristics

Technical data

Voltage	3V
Transmission frequency	2.4GHz
Transmitting power	6dBm
Standby power consumption:	20µA
Degree of protection	IP20
Zones	4
Speed mode +/-	Yes
Control type	Radiofrequency
"On"	Yes
"Off"	Yes
Memory	Yes

Services

Regulation	Monocolour - CCT - RGB - RGBW - RGBW+CCT
Power supply	2 AAA batteries (not included)
Apt for	Indoor
Fixing	Surface
Maximum distance of signal reception	30m
Connection type	Common anode
Front panel	Tempered glass

Temperatures and operating conditions

Working temperature	-10°C / 40°C
---------------------	--------------

Attention

1. The product should be installed by professionals.
2. Before switching on the power, please ensure that all wiring is correct, so as not to cause damage to the devices.
3. In the case of failure, please do not attempt to manipulate without the help of a specialised technician.

RGBW surface control panel

Dimensions and weight

Length	86mm	Height	16mm
Width	86mm	Weight	0,16Kg

Compatible with receivers:

41.026 / 41.071

40.017

RGBW surface control panel

Link / unlink

1. Linking instructions:

Link / unlink
button

1. Switch off the light and after 10 seconds switch on again.

2. When the light is on, short press any zone of "1" 3 times (within 3 seconds), after connection.

3. The light blinks 3 times slowly meaning the linking has been done successfully.

If the light does not blink slowly, the linking has failed. Please switch off the light again and follow the above steps once more

2. Unlink instructions:

Link / unlink
button

1. Switch off the light and after 10 seconds switch on again.

2. When the light is on, short press any zone of "1" 5 times (within 3 seconds), after connection.

Unlinking must be the same zone with the linking.

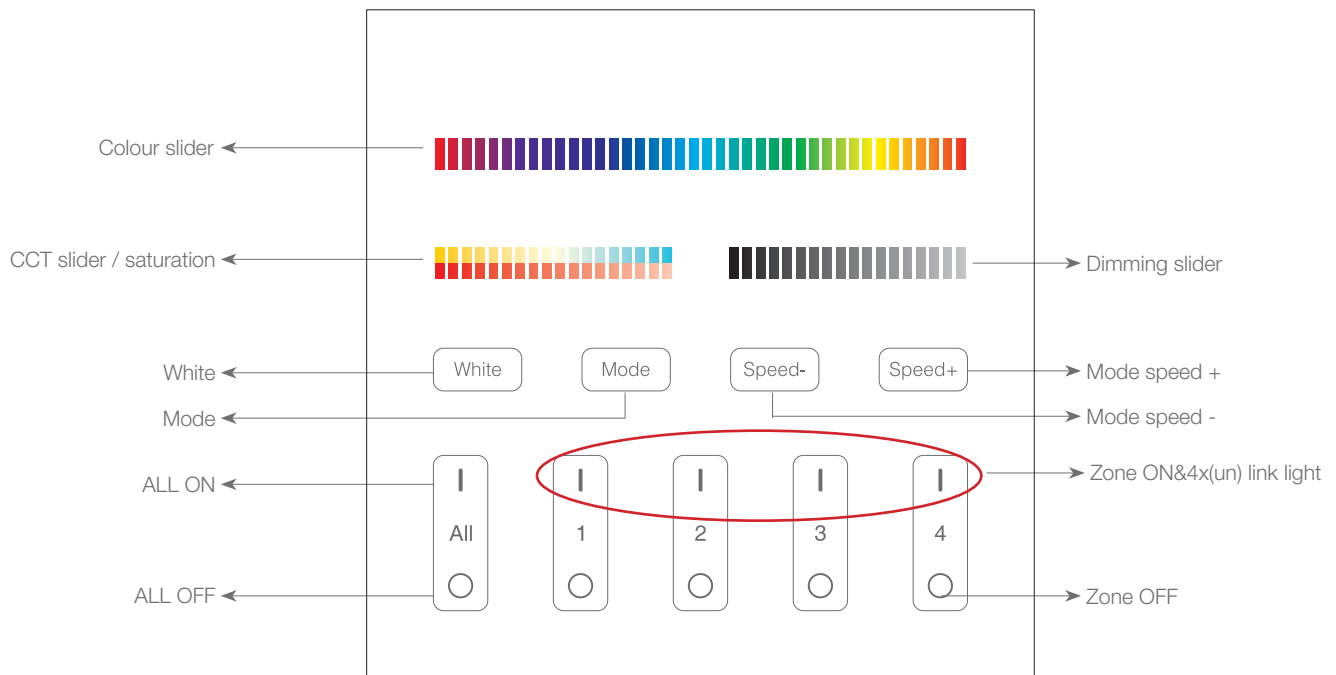

3. The light blinks 10 times slowly meaning the linking as been done successfully.

If the light does not blink slowly, the linking has failed. Please switch off the light again and follow the above steps once more

RGBW surface control panel

4-Zone Panel Remote
