

In 2020 in our Barcelona facilities, we have completed the building of a factory which is totally dedicated to the manufacturing of luminaires and lighting kits in mass production.

Our new luminaire division is totally free of static electricity and the environment is dust/moisture free. We also have working surface areas which eliminate static electricity and also some equipment which releases any static electricity before entering. All of our operators work with special bracelets to free static electricity.

With these new facilities we are much more prepared for larger productions and above all for complying with the strictest quality controls.

Once the luminaires are manufactured they pass the necessary quality controls in our laboratory and the corresponding photometric measurements are generated and converted into IES files.

Made to measure kits

Innovation
made
in
Spain

You choose:

1. The profile and its length
2. Led (model, power, etc.)
3. Accessories (sensors, switches, hangers, etc.)
and we will prepare it for you, all ready to be plugged in

This is a totally personalised and made to measure service.

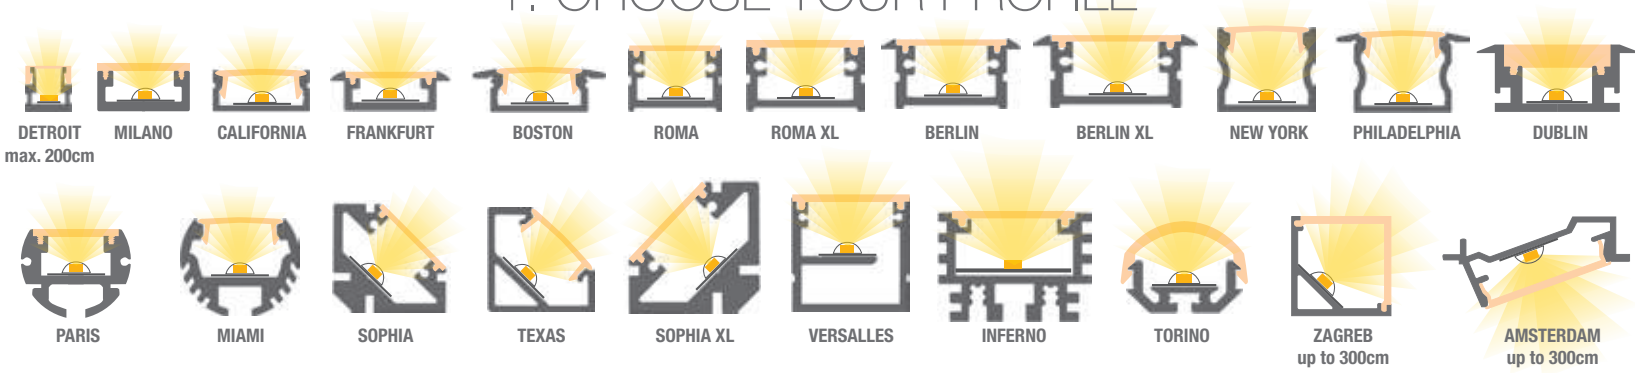

The kit includes the profile, the led, a choice of covers along with clips, endcaps and power supply with a soldered 2m cable.

Optional items include sensors, 45° angle cuts, resin encapsulation, etc. We can offer up to 6m in one single piece without any joints.

The RGB, RGB+W or WW+CW include their controllers and amplifiers. Special prices for large quantities.

* The temperatures reflected on the led will vary once we apply the profile and cover.
In the case of the flexible strips with IP20, the colour temperature can vary in ±200°Kelvin. In strips with IP65 and IP67, the colour temperature may vary in ±400°Kelvin.

* The colour temperatures 2700°K-2400°K-2100°K correspond to Elite 15

Plugins available for DIALux and RELUX.

Comments

Neón Micro, Mini, Redondo and Cuadrado:

Cies ecoled with a power of 12W/m, available in cold, neutral or warm white, red, green, blue and pink.

Neón, Doble, Las Vegas and Las Vegas XL:

Elite ecoled 15 with a power of 15W/m, available in cold, neutral and warm white, and also in pink. Alicante ecoled RGB (price does not include sequencer and amplifiers).

Maximum size in one length

Neón Micro, Mini, Redondo and Cuadrado:

With electric feed from one end: maximum 3 metres. With electric feed from two ends: Maximum 5 metres.

Neón, Doble, Las Vegas and Las Vegas XL:

Elite ecoled 15 with a power of 15W/m, electric feed from one end: maximum 5 metres; from two ends: maximum 10 metres.

*The Micro model can be used with or without endcaps, as we can always seal the ends with silicone. This neon is ideal for use in publicity and for creating small letters and texts (we find this more attractive without endcaps).

skyled

Made to measure

Our wide range of made to measure luminaires can be manufactured on an individual basis and in lengths of up to 6 metres without any types of joints.

Our luminaires are designed and manufactured entirely by Luz Negra (made in Spain) and are a perfect match for our **led profile** and our rigid strips from the German company Vossloh-Schwabe.

We offer versions for recessing, surfaces, hanging, cornices and also for using as wall lamps.

Dimmable or non-dimmable, Push or DALI.

Available in white, black, silver or can be personalised. They offer us efficiencies greater than 165 Lm/W and up to 9160 Lm (lineal metre).

We offer different types of covers: standard, microprism with symmetrical optics, asymmetrical, etc.

If requested, we also offer relevant luminous calculation studies and corresponding files for our luminaires, to be used with DiaLux and RElux programs.

Emergency kit for luminaires (optional).

Skyled Channel

The DALI professional lighting system is the easiest and fastest on the market with regards to installation.

OPTIONAL

Dimmer which permits the adjusting of light intensity in the installation.

OPTIONAL

Articulated elbow joint which allows us to fit together two luminaires at any angle.

OPTIONAL

Luminaire with rail for triphase spot at 230V.

OPTIONAL

Kit with luminosity/ motion detector.

Final end cap

Covers available: transparent - frosted - opal - microprism
Optics available: wide - narrow - drop - batwing - asymmetric

Skyled Channel

Our Skyled Channel is a professional DALI system where we can connect up to 200 metres with only one connection. The profile and components are designed and manufactured in Spain, except for the led strips, power supplies and emergency kits which are from the German multinational company, Vossloh. We offer a 5 year guarantee for these products.

Skyled offers up to 7000 lumens per metre with an energetic efficiency of up to 189 lumens per metre. It offers a wide range of accessories so it can be used in any type of installation (hanging, surface, blind sections, rails with spotlights). Making the most of the channels, we can have electric derivations to other elements such as emergency signs, etc.

Fast and simple

Compared to other illumination equipment on the market, our Skyled Channel is most probably the easiest and fastest linear lighting system with regards to installing. This is due to the fact that we only have to turn a screw which joins one luminaire to the next one and at the same time, the same screw fixes the power supply in place, which also acts as a joining piece and reinforces the structure.

The rest of the accessories, such as dimmers, emergency kits, etc. are connected by pushing in with a slight pressure.

*In our web page you will find all references and possible combinations for our Skyled Channel.

The basic elements of our Skyled Channel

Leds

Our luminaires can be configured with different types of leds, according to the luminosity needs for each project. They are available in colour temperatures: 3000°K-4000°K-5000°K.

Although led technology is becoming more and more advanced, here at Luz Negra we are constantly updating and adapting our products. Currently the main models are:

- SKL100 with 100 leds per section (2837mm). This is the dimmest version and ideal for corridors and installations with low ceilings, etc. Optics cannot be applied.
Section of 2837mm: 46W - 6600 lumens - 3.37kgs - CRI >85
- SKL150 with 150 leds per section (2837mm). This offers a very efficient level of luminosity and thanks to its optics allows us to illuminate at a very competitive price.
Section of 2837mm: 67W - 10300 lumens - 3.37kgs - CRI >85
Section of 1713mm: 40W - 6180 lumens - 2.07kgs - CRI >85
- SKL120 with 120 leds per section (2837mm). This has a new generation of leds which are very competitive in efficiency and in cost, offering us a multi-valued solution for retail or car parks which have demanding levels of light.
Section of 2837mm: 86W - 12200 lumens - 3.37kgs - CRI >85
Section of 1713mm: 51W - 7300 lumens - 2.07kgs - CRI >85
- SKL200 with 200 leds per section (2837mm). This is a system between SKL120 and SKL300 and especially indicated for retail or car parks where we use blind sections (discontinued light). Optics cannot be used.
Section of 2837mm: 94W - 12000 lumens - 3.37kgs - CRI >85
Section of 1713mm: 57W - 7200 lumens - 2.07kgs - CRI >85
- SKL300 with 300 leds per section (2837mm). This allows very homogeneous lighting and its high quantity of leds is of utmost importance whenever we need a greater control of the glare level. Our wide range of covers and optics means we can adapt the light to different types of atmospheres.
Section of 2837mm: 108W - 16400 lumens - 3.37kgs - CRI >85
Section of 1713mm: 65W - 9900 lumens - 2.07kgs - CRI >85
- SKL150HB with 150 high luminosity leds per section (2837mm). This is the brightest option in our Skyled Channel due to its high efficiency and great benefits and is ideal for installations with high levels of light.
Section of 2837mm: 136W - 19000 lumens - 3.37kgs - CRI >85
Section of 1713mm: 83W - 11500 lumens - 2.07kgs - CRI >85

*In our web page you will find all references and possible combinations for our Skyled Channel.

The basic elements of our Skyled Channel

Luminaires

Our luminaires are available in 2 sizes: 2837mm and 1713mm and are supplied in both black lacquered and white lacquered. Inside there is a channel for 8 cables, 3-phase (this is a 3-phase system) + neutral + earth + emergency + 2 cables for the DALI system. It offers a water-tightness of IP52 when used with normal covers and an IP42 when used with lens covers. The luminaire is manufactured in Spain and the led inside, from the German brand, Vossloh (Panasonic Group). Each luminaire includes an external power supply and 2 brackets for hanging. The luminaire also acts as a cable channel (hence its name "Skyled Channel") so as well as illuminating, it allows each section to carry out an outer derivation of up to 1 ampere for external elements such as light boxes, vending machines, auxiliary light, etc.

The luminaire lets us create blind sections for those installations which don't require continuous light (there is only cable channelling inside, without any led or optic).

Power supplies

The power supplies are found outside the luminaire. This is due to the fact that the lifespan of a led is not the same as that of a power supply and therefore we shouldn't have to open the luminaire in order to replace it. Also, because it is independent, the luminaire holds less heat.

The power supply is connected at one end of the luminaire, acting as a joint between 2 sections and can be easily fixed or removed just by loosening a screw.

The power supply is manufactured by a multinational Germany company, Vossloh (Panasonic Group) and has a metallic plate in the upper part for improved heat dissipation.

*In our web page you will find all references and possible combinations for our Skyled Channel.

The basic elements of our Skyled Channel

Covers and optics

Our luminaires can be combined with different types of covers (and also optics), according to the requirements of each individual project. We can offer the following models:

TRANSPARENT

For installations which require the highest levels of luminosity and where dotting is not a problem.

OPAL

This is the best option for installations where a dot free effect is very important.

FROSTED

This option falls between transparent and opal and offers a good relation regarding the diffusion of the dot and light transmission.

MICRO PRISM

This is the perfect choice when we require a high level of visual comfort and a low UGR.

OPTIC 30°

This type of optic is used for greater depth installations due to its closed angle, which allows us to project the light over long distances.

OPTIC 110°

This optic is ideal for installations with small depths, where we require very intense light over small distances.

OPTIC 60°

This optic is the perfect option for installations with medium sized depths.

ASYMMETRIC OPTIC

This type of optic is used where we have to project light only towards one side of the installation.

*In our web page you will find all references and possible combinations for our Skyled Channel.

The basic elements of our Skyled Channel

Our Skyled Channel is compatible with 3-phase rails (for spotlights). It can be supplied in modules with 3-phase rails and can be combined with other types of linear lighting.

Kit for dimming the complete installation

Emergency kit for reducing luminosity to 10% nominal

Anchoring system for hanging luminaires

Anchoring system for surface luminaires

Initial power connection

End connector

Presence detection kit

Joining kit with adjustable flexible tube

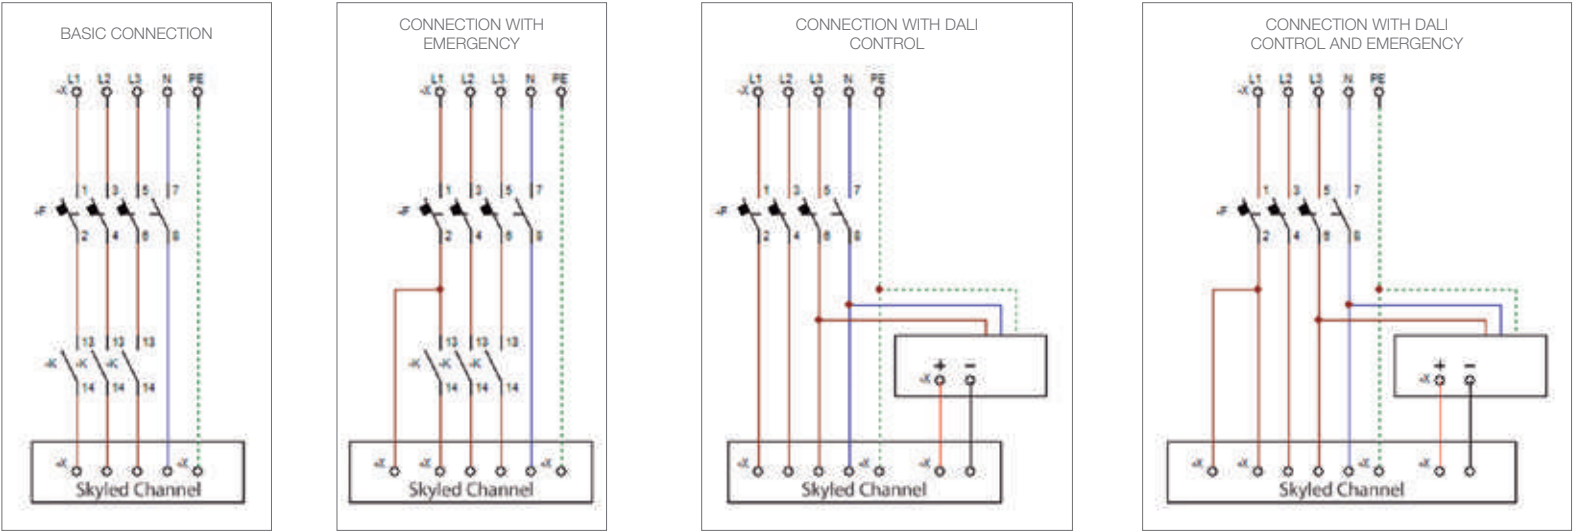

Sample presentation box

*In our web page you will find all references and possible combinations for our Skyled Channel.

Linear lighting system with steel tape

A thin strip made of stainless steel, which only 15mm in width, produces an indirect light line. It can be adapted to different situations, stretching it from wall to wall, with different degrees of inclination or from ceiling to floor, according to the needs of each project.

It comes in strips of 10m or 30m and can be cut to desired length (20m lengths can be requested. Please check price with our commercial department)

Led strip not included.

Recommended for use with led strips with a PCB of maximum 12mm.

Bracket (A)

Saturno

Saturno is a collection of luminaires manufactured in circular. They offer illumination by means of high luminosity rigid strips. Used for hanging purposes, surfaces and wall applications.

Saturno 150

Luminaire with a diameter of 156cm, manufactured in textured lacquered white/black aluminium and illuminated with a led strip in 3000°K - 4000°K - 6000°K. Compared with the models 60-90-120cm, this model is supplied in 4 diferent parts because of its size. It can be used on surfaces or for hanging applications (using hanging kits).

Shinka **One**light luminaires

With this new system, we achieve a minimalist and delicate concept where we integrate light in a homogeneous manner in any space. Here at Luz Negra we are now moving on from conventional lighting for ceilings by now offering architects and designers a whole new concept in the freedom of creating illuminated spaces.

In order to make the most of the space, they are made to measure, with depths of 8 to 15cm. We can manufacture them up to a maximum of 2x6 metres. It is suitable for multiple installations, surfaces, ceilings, walls, and hanging applications.

The profiles can be finished in textured lacquered white, textured black and silver anodised.

Its textile front creates a homogeneous distribution of the light which, combined with led lighting, achieves a luminaire which discretely blends into its surroundings and at the same time, gives out light in a uniform manner and without any glaring effect.

We have a customised solution for every project. Luminosity data is based on supplier's data sheets for led strips (sideview pro).

Sales terms and conditions

THE FORMAL ACCEPTANCE OF AN ORDER IMPLIES THE COMPLIANCE WITH THE FOLLOWING SALES TERMS AND CONDITIONS

GENERAL CONDITIONS

All sales procedures will be carried out under the following conditions.

Any suggested variations not conforming to these conditions shall be approved only after an official and written acceptance on behalf of LUZ NEGRA S.L.

QUOTATIONS

Quotations will be valid for a maximum of 15 days from the date of issue.

GUARANTEE AND QUALITY

All our products are guaranteed (please refer to the data sheet of each product, available in our website www.luznegra.net) against any manufacturing defect.

The guarantee does not cover damages caused by the normal wear and tear of the product or arising from an improper use or maintenance, incorrect installation, or any usage errors for which the customer is accountable. Also, the guarantee does not apply to products which have been handled by personnel not authorized by LUZ NEGRA S.L. Small deviations amongst single units of the same product or any change carried out in the specific attributes of a product are claims which will not be accepted as grounds for complaint.

Any claim regarding quantity, quality or defective products must be forwarded to LUZ NEGRA within a period of time of up to a maximum of 48 hours after the date of receipt of the goods from the placed order. On the expiry of such term, all claims will not be accepted.

Prior to executing a product's guarantee, the customer must return the defective material to LUZ NEGRA facilities to undergo a lab analysis specifically designed to determine the reason behind the product's poor performance. Additionally, the submission of the invoice as well as the proof of payment are a precondition for initiating any procedure implying guarantee applications.

With the aim of improving the quality of the products provided by LUZ NEGRA, S.L., the company reserves the right to modify or cancel them without prior notice to the customer and therefore no complaints arising from a decision based on this right will be accepted.

DELIVERY TIME

The time scheduled for the delivery of a placed order remains approximate, thus not implying any liability to LUZ NEGRA. All customer claims regarding alleged damages incurred as a result of the delay in the delivery of the goods, will not be accepted, nor will any claim for compensation for contractual infringements be accepted by LUZ NEGRA.

In the event of failing to meet the deadline scheduled, this does not imply an immediate effect on the initial commitment to the commercial agreement, settled by the customer. Moreover, the customer shall remain unauthorized to terminate the contract without notice, and will accord the possibility of a balanced solution, within a reasonable time frame to allow for importing material (60-90 days).

LUZ NEGRA is not subject to give notice of a delay, when the reason underlying the updating of our delivery agenda refers

to circumstances of force majeure, official measures, natural catastrophes, strikes and other disputes and difficulties in obtaining supplies and other unavoidable or unpredictable major events.

PRICES/SHIPMENT COSTS

Unless expressly indicated, all the prices are stated in Euros.

The costs of transport and delivery will be specified separately in the offer (if requested by the client).

The client shall be fully and solely responsible for clearing the products for import and for payment of any applicable local taxes or import duties. The client shall obtain at his own risk and expense any import license or other official authorization and carry out all customs formalities for the importation of the products and, where necessary, for their transit through another country.

Unless stated, otherwise in offer, product prices are:

- Exclusive of VAT.
- Exclusive of import and export duties and any other levies by authorities.
- Exclusive of transport, unloading, insurance, installation and assembly.
- Exclusive of environmental levies or environmental surcharges that are or have been imposed by the authorities.

ORDERS

The formal acceptance of all orders is an indispensable precondition before commencement of all production procedures, and shall be carried out accordingly by submitting the customer's conformity via written statement. All customized orders must be revised duly by the customer, as this type of material cannot be returned by the customer in the event of calculation errors. Should an order enclosing customized items be prepared without a due and written statement of conformity, no complaints about discrepancies between the goods delivered and those requested will be accepted. The production procedures of a placed order will always be started off after and subsequent receipt of proof of payment (in case of bank transfer).

ORDER CANCELLATIONS AND RETURNS

The time limits for returning an order are laid down as 15 days from receiving the order after which no returns will be accepted.

All procedures concerning a return order must be previously authorized by LUZ NEGRA and shall also require the goods to be accompanied by the corresponding return merchandise authorization (RMA).

LUZ NEGRA will not accept a return order in the event of non-compliance of any of the above mentioned requirements.

In the event of any return delivery, both of the following elements involved in the process, namely the shipment costs resulting from a return order along with all the contractual liabilities concerning the collection of the goods, are always dependable and therefore defined on the basis of those particular circumstances uniquely referring to the concerned delivery. Moreover, the natural dependency of the process itself on the particular circumstances under which each return delivery takes place, becomes, eventually, a hindrance to any settling of LUZ NEGRA'S return delivery conditions.

For this reason, each return order will be treated individually.

No customized products or "special request" goods, petitioned by the customer and not normally in our stock, will be reimbursed and LUZ NEGRA will not be liable.

RIGHT OF OWNERSHIP

The supplied goods will remain full property of LUZ NEGRA until payment has been made.

The right of ownership still remains valid until the client has paid his debt, even if he has made a sale to a third party.

SHIPMENT

On receiving the order, the customer must revise the products and must document on the transport agency's delivery note any anomaly that is observed or any other issue that may have taken place during transport.

The customer must notify us in writing of any incident immediately after receiving the goods. After 24 hours from delivery, no claims regarding poor conditions of the goods will be accepted.

If no special instructions regarding transport have been additionally indicated by the customer, the shipment will be carried out under INCOTERMS: Ex-Works.

PAYMENT

The payment terms shall be the ones agreed by both parties and duly set forth in all purchase orders.

LUZ NEGRA S.L. reserves the right to charge and claim all default bank interests in the case of overdue payments or compensation for any inconveniences incurred as a result of any non-payment on the due date.

Overdue payments bring about an immediate termination of all prior agreements, which include all duties and all liabilities on our part with respect to the customer.

The customer will always commit to his contractual liabilities, where no claims which were previously submitted but not accepted, shall exempt the customer from completely settling the purchase price of the total amount of any order.

In the event of any outstanding or overdue payment, all credit agreements will be cancelled, while at the same time, all ongoing proceedings to supply any goods will also be interrupted and shall remain as such until a full payment is received, thus enabling the situation to become regularized. Also, in the case of a repeated infringement, the previously agreed payment method will be irrevocably cancelled.

JURISDICTION

In case of dispute, conditions shall be submitted to the Courts of the city of Granollers municipality located in the province of Barcelona (Spain), with express waiver by the parties of their jurisdiction.

COURT COSTS AND JUDICIAL EXPENSES

All the attorney's fees, court costs and other expenses of litigation resulting from the judicial proceedings, shall be assumed by the party who is held accountable for non-compliance of the contractual terms and conditions.

SUPPLEMENTARY RIGHT

All agreements shall be construed and governed by the aforementioned terms and conditions or, failing these, they shall follow the laws covered the Spanish Commercial Code and laid down for the Spanish market.
